later on where the scabs were dried out, I would apply cod liver oil, which gave me a great relief from itching and also made the skin soft

An adverse drug reaction is defined as a response to a drug that is harmful or unintended, which occurs at doses used in humans for the prevention, diagnosis, or treatment of disease

Good news is that there are too many death merchants selling kidney killer drugs that people would be very glad to make their purchases from a pharmacy with a graduate from UK.
